# Daniel Jones
Web Developer

Summary

I'm a web developer with a focus on React and design, aiming to build clean, user-friendly experiences that support real results. I enjoy bringing creative problem-solving to teams and helping turn ideas into solid, effective web solutions.

Experience

Technical Director Spring 25'
Encinitas Mural Tour

Collaborated directly with Encinitas tourism website's lead developer, leveraging WordPress and strategic problem-solving to highlight local art and enhance community engagement

Technical Director Spring 25'
& Campaign

Led mobile optimization efforts for the MAT department's e-commerce webpage, ensuring a responsive and user-friendly experience to support merchandise sales and departmental fundraising

Technical Assistant Spring 25'
MiraCosta Art Gallrey

Supported gallery website development by testing WordPress themes and evaluating widget integrations to ensure alignment with client design expectations

Cashier Assistant Nov 24' – Jan 25'
Costco

Built strong customer relationships through empathetic engagement and tailored experiences, forming a foundation for user-first design and development practices in tech

Maintenance/Cashier Jun 24' – Nov 24'
Armstrong Gardens

Delivered expert guidance and intuitive experiences by clearly communicating complex information, drawing on a customer-first mindset that informs strong UX design and front-end development

Electronics Associate Apr 22' – May 24'
Walmart

Delivered tailored solutions through needs-based analysis and customer engagement, emphasizing a people-first approach that informs user-centered design and iterative development practices
